Dear Parents,

Over the course of the next two weeks, teachers and students will be involved in the assessment of student learning. The information gathered in a more formal assessment period adds to the ongoing and cumulative picture that teachers have of their students.

Assessment is the process of collecting evidence of student learning in order to draw an inference about an individual’s (or a group’s) current level of attainment. The fundamental purpose of assessment and reporting is to improve student learning. This is true at the system, school and classroom level. It is Department of Education and Training policy that assessment and reporting of student learning be undertaken formally and informally for all learners, including students with disabilities. Assessments gathered during this period of the school year are just one part of the information that teachers have gathered about your child. Regular spelling tests, maths topic tests, oral assessments and project/assignment work all add to the three-dimensional picture of student progress.

As much as teachers try to alleviate the pressures around assessment time, some children find this period of more formal assessments to be stressful. It is important to talk to your children about what the next couple of weeks hold for them. Each class will pace the assessment tasks across the couple of weeks in order to maintain routines as much as possible.

Assessments are draining on energy. Children put a lot of effort and concentration into doing their very best on the day. It is very important to look after your child’s physical health during ‘exam’ time. Whether it’s a HSC exam or a Year 2 reading assessment, it is important for mental health to eat well, get lots of sleep and remember to exercise each day. We could all take a leaf out of that book at times. Very apt for Habit 7 – Sharpen the Saw!

Enjoy a great week,
Sue Mackay
Principal

**Habit 7: Sharpen the Saw**

Suppose you came upon someone in the woods working to saw down a tree. They are exhausted from working for hours. You suggest they take a break to sharpen the saw. They might reply, "I do not have time to sharpen the saw, I’m busy sawing!"

Habit 7 is taking the time to **sharpen the saw**. By renewing the four dimensions of your nature - physical, spiritual, mental and social/emotional, you can work more quickly and effortlessly. To do this, we must be proactive.
